LEDs, resistors, battery from www.component-shop.co.uk

Electronic units shown are available from www.component-shop.co.uk

Mast, Interior and Navigation Lights are all 12v Grain of Wheat bulbs. Floodlights are 3mm dia Ultra Bright White LEDs with 470R x 1/4W series resistors. Note that the flat on each LED indicates the negative lead (Cathode) - this is also the shorter of the two wires. Insulate these wires and make sure you get them the right way around!

*Note: Spare channel for P62 MUST be a stick-operated proportional channel
